

1C Company highlights

- More than **1 million** companies use 1C:Enterprise platform
- About **7000 partners** deploy and customize 1C:Enterprise solutions
- Over **1500 solutions** passed 1C:Compatible certification
- In 2012, 1C Company ranked by IDC as one of the **top 100 vendors** of Worldwide Commercial Software
- 1C:Enterprise is localized into 17 languages (English, German, French, Chinese, etc.)

Established in 1991, **1C Company** develops, distributes, publishes and supports business and multimedia software from its headquarters in Moscow, Russia. Its best-known business applications platform is **1C:Enterprise**, a flexible and powerful suite of solutions that automates routine operations and real-time accounting, and provides timely information for decision-making throughout an organization. Used by over 1 000 000 companies in Europe, the company is actively expanding its global partner network.

1C:Enterprise is a rapid-development platform for quick and cost-efficient creation of customized business applications. It ensures efficient user work and reliable data storage with simultaneous access of multiple users to a single database. The three-tier architecture of the system guarantees consistently high performance in the event of significant increase of the system load and volume of data being processed. High fault tolerance is achieved through a redundant cluster of servers, and performance optimization is based on dynamic load balancing between clusters.

1C:Enterprise uses industrial DBMS (Oracle Database, IBM DB2, MS SQL Server, or PostgreSQL), which allows building high-performance and reliable information systems. The thin client and the web client support user work over the Internet, including mobile communication channels. The web client does not require pre-installation on a user's computer.

1C:Developer network: partner, user and developer community center

1C:Developer network www.1c-dn.com is the one-stop resource for both developers and business partners to learn about the 1C:Enterprise platform capabilities and the 1C:Partner program. This includes developer tools, forums, education, and partner program details. It also provides information on available solutions and solution certification requirements.

1C:ERP is an innovative solution for the development of integrated information systems intended for management of diversified businesses, including technically complex multistage production, based on the best international practices of automation of large and medium-sized businesses.

1C:ERP solution is the next generation of the 1C:Manufacturing Enterprise Management ERP-class system, which is number one on the Eastern Europe market and summarizes 10 years of experience in large-scale projects with hundreds and thousands of workstations. At the moment more than 16 000 companies in the world use ERP solutions of 1C Company.

The key advantages of the new flagship solution are:

- **extensive functionality** at the level of world-class ERP systems;
- flexible and productive modern **1C:Enterprise platform** that supports work over the Internet, including cloud technologies and access from mobile devices;
- a large number of customized solutions that extend the capabilities of the system (**PDM, MES, EAM, PMO, ITIL, CRM, MDM, WMS, TMS, BSC, ECM, CPM**, etc.);
- **over 300 000 engineers** skilled in 1C:Enterprise programming language;
- **low cost of ownership** and significant economic effect, which includes an increase in productivity and a rapid return on investment.
